Dec 13, 2017 · Outlines of Post Harvest Management & Value Addition of Fruits & vegetable. Importance of post harvest technology of horticultural crops. Maturity

indices, harvesting and post harvest handling of fruits and vegetables. Maturity and ripening process. Factors affecting ripening can be physiological, physical, or biotic.

Marketing of Vegetables: In India it is often found that

there is glut of a particular vegetable in one part of the country when it is scarce in the other part. Due to improper post-harvest management and lack of adequate processing facilities a huge quantity of fruits and vegetables are lost

in our country.

factors include soil quality and management, rootstock, irrigation, training and pruning and crop load manipulation. The influences of important pre-harvest factors on postharvest quality of fruits

and vegetables are described below. 1. Temperature
Atmospheric temperature has been found to influence fruit shape, size, colour and other

Jan 01, 2018 · The main objective of postharvest fruit disease management is to

keep the fruit disease-free or symptom-free until it is marketed or consumed. Hence, the management strategies should aim at prevention, eradication, and delaying the symptoms of diseases during transit and storage of fruits and vegetables (Sharma and

Alam, 1998; Barkai-Golan, 2005).

Oct 09, 2018 · Postharvest Practices After harvest, fruits and vegetables need to be handled with care to maintain freshness, nutrient content, taste and quality. Fruits and vegetables are

highly perishable, and so poor after harvest handling can result in losses.

important fruits and vegetables in Bangladesh under the leadership of the author. After successful completion of the project, huge information was

gathered and enormous postharvest losses of fruits and vegetables were observed. Presently, the country has very limited resource personnel in the sector of postharvest technology of fruits and ...

Obviously, postharvest management determines food quality and safety, competitive-ness in the market, and the profits

earned by producers. The postharvest management of fruit and vegetables in most developing countries in the region is, however, far from satisfactory.
